

WHAT IS CLAIMED IS:

1. A flexible printed circuit film, comprising:
 - a body;
 - a first pad provided at one end of the body to be adhesively connected to a pad of a first printed circuit board;
 - a second pad provided at other end of the body to be engaged to a connector of a second printed circuit board;
 - and
 - at least one recess defined in the body.
2. The flexible printed circuit film according to claim 1, wherein the recess is defined in the body in a region adjacent to the second pad.
3. The flexible printed circuit film according to claim 2, wherein the recess is defined in at least two side surfaces of the body in the region adjacent to the second pad.
4. The flexible printed circuit film according to claim 1, wherein the body has at least one bent portion.
5. The flexible printed circuit film according to claim 4, the body having at least two side surfaces wherein the at least one recess is defined at each of the at least two side surfaces in a region adjacent to the bent portion.
6. The flexible printed circuit film according to claim 4, wherein a first recess is defined at the bent portion and said at least one recess is defined in the body in a region adjacent to the second pad.

7. The flexible printed circuit film according to claim 4, wherein said at least one recess is defined at the bent portion.

8. The flexible printed circuit film of claim 1, wherein the at least one recess has a substantially concave shape.

9. The flexible printed circuit film of claim 1, wherein the at least one recess has a substantially curved shape.

10. A flexible printed circuit film, comprising:

a body having a first portion and a second portion, the first portion intersecting the second portion to form a corner portion, the corner portion having an inner vertex and an outer vertex;

a first pad connected at an end of the first portion;

a second pad connected at an end of the second portion; and

a first recess in the body.

11. The flexible printed circuit film of claim 10, wherein the first recess has a substantially concave shape.

12. The flexible printed circuit film of claim 10, wherein the first recess has a substantially curved shape.

13. The flexible printed circuit film of claim 10, wherein the first portion is substantially perpendicular to the second portion.

14. The flexible printed circuit film of claim 10, wherein the first recess is at the inner vertex of the corner portion.

15. The flexible printed circuit film of claim 14, further comprising a second recess in a region of the second portion of the body, the region being between the outer vertex of the corner portion and the second pad.

16. The flexible printed circuit film of claim 15, wherein the second recess has a substantially concave shape.

17. The flexible printed circuit film of claim 15, wherein the second recess has a substantially curved shape.

18. The flexible printed circuit film of claim 10, wherein the first recess is at a region between the inner vertex and the second pad.

19. The flexible printed circuit film of claim 18, further comprising a second recess in a region of the second portion of the body, the region being between the outer vertex of the corner portion and the second pad.

20. The flexible printed circuit film of claim 19, wherein the second recess has a substantially concave shape.

21. The flexible printed circuit film of claim 19, wherein the second recess has a substantially curved shape.
